

#### **Features**

- 3.2mm\*1.6mm SMT LED, Super thin (1.10H mm)
- Low Power Consumption
- Wide Viewing Angle
- Various Colors
- Compatible with automatic placement equipment.
- Compatible with infrared and vapor phase reflow and wave solder process.
- Meet ROHS Green Products
- Package: 3000pcs/Reel

## **Applications**

· Backlight and Indicator

# **Package Dimensions**

### **Notes:**

- 1. All dimensions are in millimeters (inches).
- 2. Tolerance is  $\pm 0.2$ mm (.0079") unless otherwise noted.
- 3. Specifications are subject to change without notice
- 4. This drawing is only for reference, not as a basis for the actual structure.

#### **SMT Reflow Soldering Instructions**

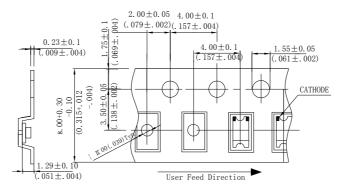

#### Notes:

- Sells gives no other assurances regarding the ability of to withstand ESD. It is recommended to use a wrist band or anti-electrostatic glove when handling the LED. All devices, equipment and machinery must be properly grounded.
- 2. Reflow soldering should not be done more than two times.
- 3. Do not stress LED when soldering, and do not warp the circuit board after soldering
- 4. While using Iron, Power dissipation of Iron should be smaller than 25W, and temperature should be controllable. The work should be finished within 2 sec under 320°C for once only.

#### **Recommended Soldering Pad Dimensions**

#### Package Specifications (Units: mm (inches))

### Notes:

- 1. The LEDs should be used within a year.
- 2. The LEDs should be kept in 5~30°C and 60% RH for less.
- 3. The LEDs should be used within 24 hours, or else should be kept a 5~30°C and 30% RH or less. And LEDs should be used within 7 days after opening the package.

# Judgment criteria of failure for the reliability

| Measuring items    | Symbol             | Measuring conditions | Judgment criteria for failure |
|--------------------|--------------------|----------------------|-------------------------------|
| Forward voltage    | V <sub>F</sub> (V) | IF=20mA              | Over U×1.2                    |
| Rvevrse current    | Ir(µA)             | V <sub>R</sub> =5V   | Over U×2                      |
| Luminous intensity | Iv(mcd)            | IF=20mA              | Below S×0.5                   |

Note: 1.U means the upper limit of specified characteristics. S means initial value.

2.Meansurment shall be taken between 2 hours after the test pieces have been returned to normal ambient conditions after completion of each test.
